

EY Techathon 6.0 Executive Summary

Date of submission: 09-11-2025

The better the question. The better the answer. The better the world works.

Shape the future with confidence

Quick introduction

We’re Team **Agent 007**, building an **Agentic AI** platform to revolutionize pharmaceutical R&D by automating drug repurposing research — turning months of manual analysis into hours of insight.

About the team

Technical skill or skills each member brings to the team

01#

Gurjas Singh Gandhi

- Agentic AI dev
- Full stack dev
- Langchain

02#

Sameer Bagul

- Full stack dev
- Backend Expert
- DevOps Expert
- Nginx

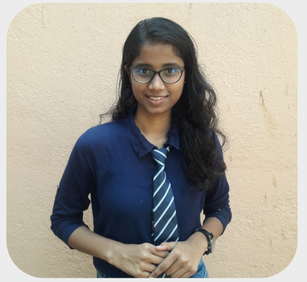

03#

Adish Gujrathi

- UI developer
- Tailwind CSS
- ML algo expert

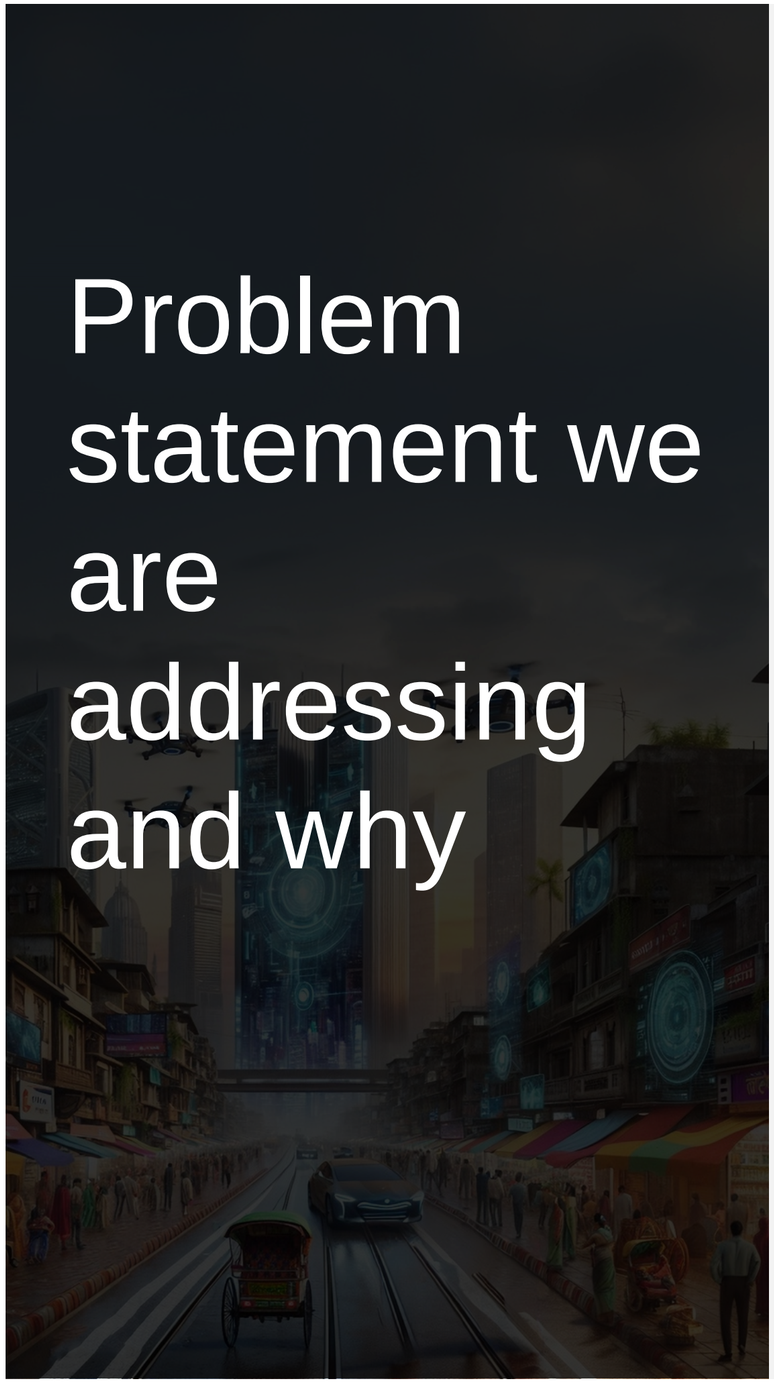

04#

Anushka Upadhye

- LangGraph
- GenAI Dev
- Python Dev

Problem statement we are addressing and why

Challenge

Pharmaceutical R&D teams spend 2–3 months manually reviewing literature, patents, and clinical data to identify re-purposing opportunities for approved drug molecules.

Why It Matters ???

- The generic drugs market is saturated, with low margins and intense competition.
- Companies need innovative, value-added products targeting unmet medical needs.
- The traditional research workflow is time-consuming, fragmented, and repetitive, often missing insights hidden across scientific, regulatory, and trade data sources.

Our Proposed Solution To This :

To build an Agentic AI–powered research assistant that:

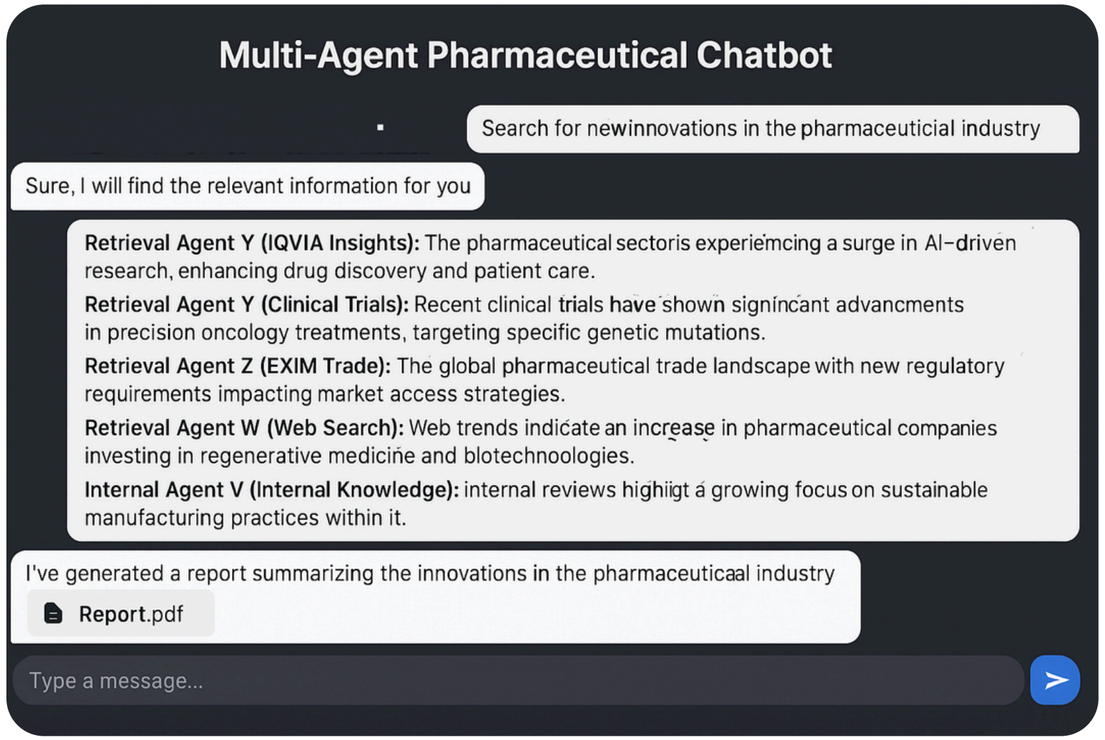

- **Automates data discovery** across literature, patents, clinical trials, and trade sources
- Reasons intelligently through **domain-specific agents** (clinical, patent, market, regulatory)
- **Synthesizes insights** using an LLM (Mistral-7B) for evidence-based, explainable outputs
- **Delivers reports and dashboards** via an **interactive web app & chat interface**
- Accelerates pharma R&D — **cutting research time from months to hours**

Our approach for solving the problem

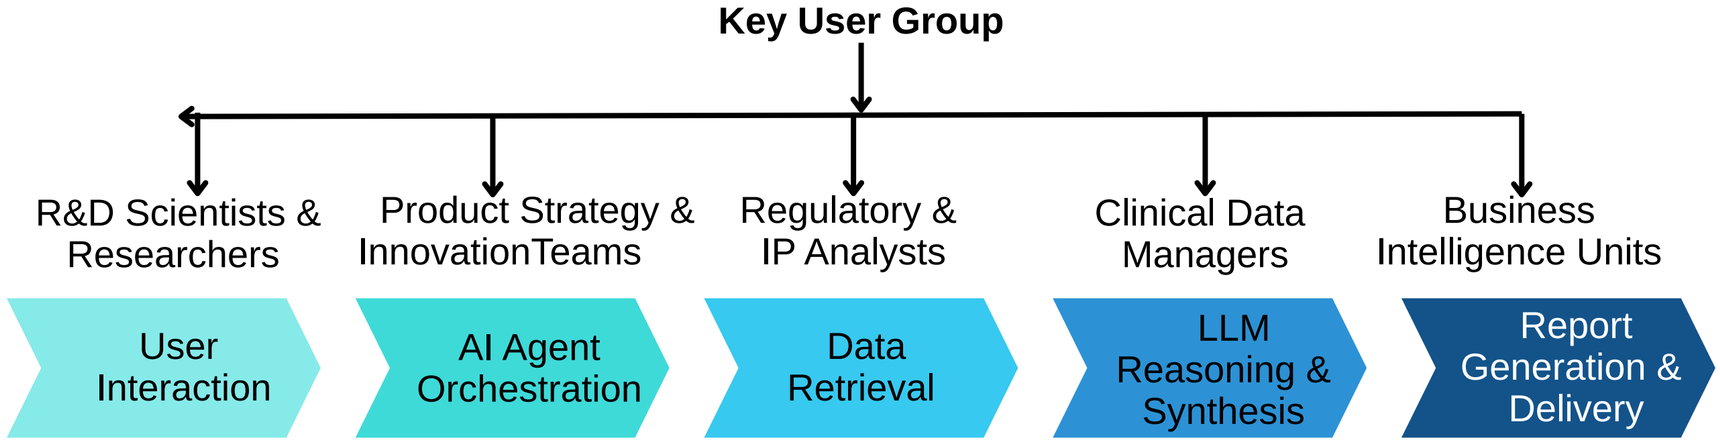

Describing :

- Output Form Factor [Web App+Chat Bot]
- Key User Group
- User Journey

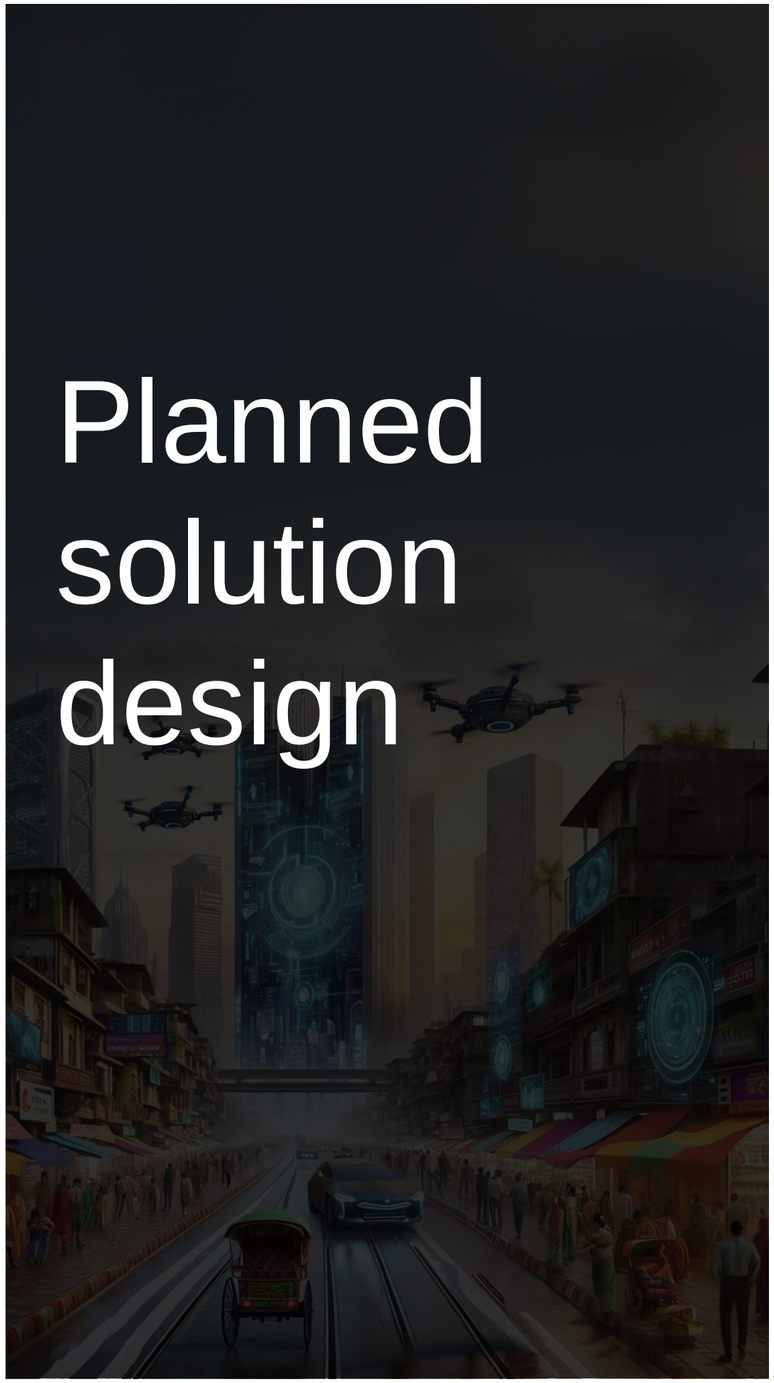

Output Form Factor

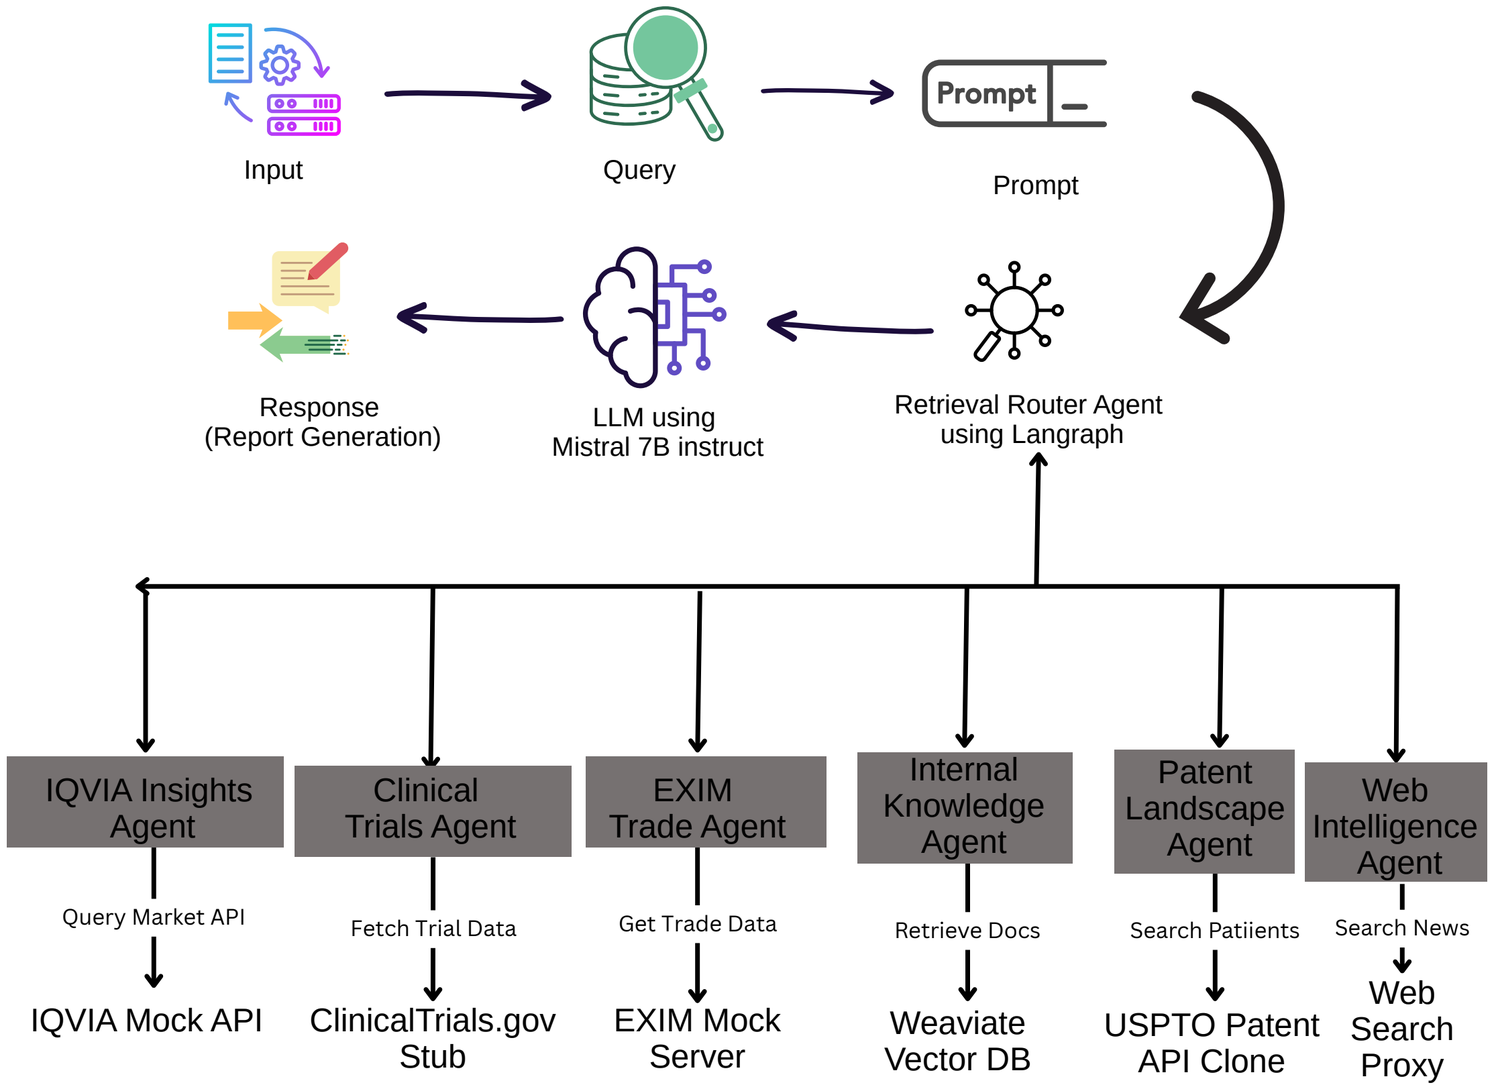

Key User Group

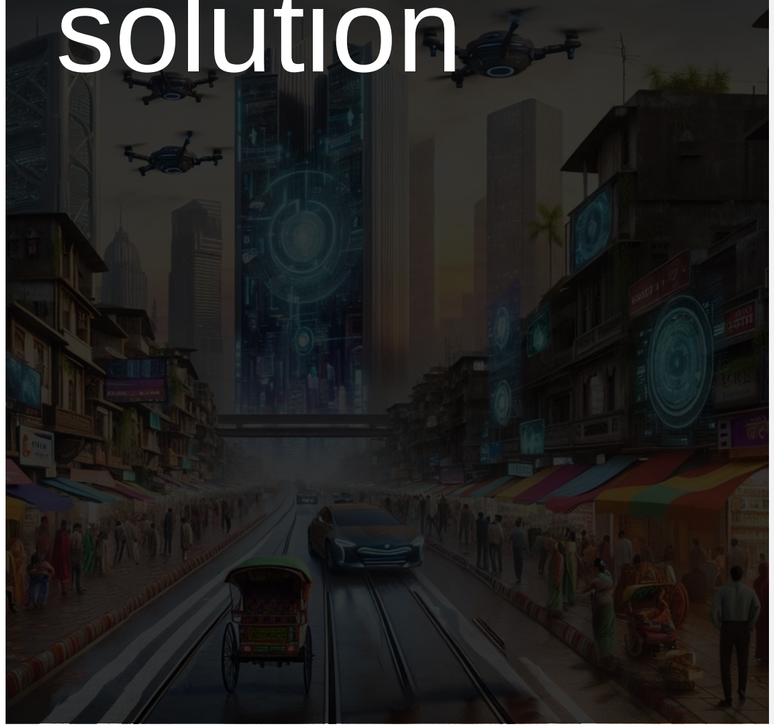

Planned solution design

Potential Benefits from our proposed solution

Potential Benefits from Our Proposed Solution

Our solution is engineered to deliver a competitive edge through intelligent automation. Here’s how we will create value:

- **Dramatic Efficiency Gains**: We will **accelerate research cycles** by up to 80% and **reduce costs by approximately 85%** by automating data analysis across clinical, patent, and market domains.
- **Unmatched Scalability**: We will empower your **analysts to handle 4x more projects**, multiplying your team's output without increasing headcount.
- **Superior Decision Intelligence**: We will leverage **LLM-driven reasoning** to provide **evidence-based insights** for innovation discovery and drug repurposing.
- **Robust Compliance & Trust**: We will ensure complete transparency with a fully logged and explainable AI process, creating clear audit trails.
- **Tangible Financial Return**: We are projected to deliver a 3.5x ROI over three years by unlocking faster time-to-insight and cutting operational costs.
- **Future-Proof Architecture**: We will provide a scalable and secure, on-premise capable platform to protect sensitive data and adapt to your evolving needs.
